

2024 Rice Pest Management Course Wednesday, September 4, 2024

Hamilton Road Field (West Hamilton Rd. between Hwy. 99 & Riceton Hwy., Biggs, CA)
and **Rice Experiment Station** (955 Butte City Hwy., Biggs, CA)

This year will mark the 5th rice-specific pest management course at the Hamilton Road Field and the Rice Experiment Station in Biggs, CA. The day will begin with an interactive field tour of the herbicide research plots (Hamilton Road Field) where attendees can get up close to the weeds and rice (bring your boots!) The morning continues with a hands-on weed identification session on emerging and mature weeds, a disease identification session and a weed ID quiz. Following a light lunch, speakers will address several pertinent topics in CA rice, including arthropods and diseases, a regulatory update, weedy rice, new herbicides, and how to construct a weed management program. *CE credits pending.*

Agenda

BRING YOUR
BOOTS!

7:30-8:00am	Check in at Hamilton Road Field
8:00-8:10am	Introduction - <i>Whitney Brim-DeForest, UCCE</i>
